

SYNC YOUR MASTERTHERM WITH THE AGILE OCTOPUS TARIFF FOR SMARTER ENERGY SAVINGS!

A SMART SYSTEM WHICH SELF-OPTIMISES TO SAVE YOU MONEY

MasterTherm integration with Agile Octopus can achieve up to 35% additional savings on your heating and hot water on the already low costs of running a heat pump.

100% Renewable Electricity

Plunge Pricing

Smart System

octopusenergy

HOW DOES THE AGILE TARIFF WORK?

With Agile Octopus, you get access to half-hourly energy prices, tied to wholesale prices and updated daily. So when wholesale electricity prices drop, so do your bills – and if you can shift your daily electricity use outside of peak times, you can save even more.

Agile Octopus Plunge Pricing takes it one step further, allowing you to get paid for the electricity you use during negative price events. You'll receive alerts whenever prices drop below zero, so you can use our Agile API to program your smart devices.

HOW DOES IT WORK WITH MY HEAT PUMP?

When integrated with a smart meter, your MasterTherm heat pumps will operate when electricity costs less whilst still achieving your preferred temperatures and heating schedules, significantly reducing your electricity costs.

The innovative system will learn how long your house takes to heat up and cool down. It then looks at weather forecasts and electricity prices to make sure your house is heated at the cheapest times throughout the day to meet your desired temperature enabling you to take advantage of the Agile Octopus tariff.

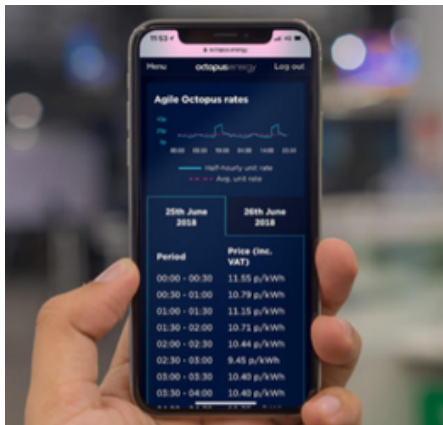

Agile Octopus includes Price Cap Protect, which ensures you'll never pay more than 100p / kWh for your electricity, guaranteed. Even if you continue to use your electricity as normal, you'd still save money compared with tariffs from the big 6 energy providers.

"A SMARTER SYSTEM DESIGNED TO SAVE YOU MONEY WHILST USING MORE SUSTAINABLE ENERGY"

GETTING SET UP - 3 SIMPLE STEPS

1. Visit Octopus Energy and apply for an account. You can use our [referral link](#) which will qualify you for £50 credit.
2. Once set up with Octopus, you'll need to purchase a smart meter Octopus can connect to.
3. Once connected Octopus will be able to remotely connect to your MasterTherm heat pump and set up your connection to Octopus Agile.

WHAT OUR CUSTOMERS ARE SAYING....

"My system with Agile Octopus is up and running and has reduced my electricity consumption by 35%. Very happy!"

**Anthony Phillips,
MasterTherm Customer**
